PROFILE

Self-taught full stack web developer with a passion for well-made products which are accessible and usable.

EXPERIENCE

Front-end web developer

MavTek - Montreal, Quebec | August 2021 - September 2024

Development of features on an e-commerce platform to facilitate monetization of user's passions.

- Front-end development using VueJS, ReactJS and NextJS.
- Use and development using backend APIs with technologies such as Laravel (PHP) and different AWS services such as DynamoDB, CloudFront and S3.

Full stack web developer

AmigoExpress - Montreal, Quebec | January 2020 - Avril 2021

Development of a ridesharing platform serving members across Canada. Notably, I have participated in version 2 of the itinerary search page.

- Frontend development of features using VueJS & TailwindCSS
- Maintenance and feature development on a Laravel (PHP) backend API

Full stack web developer

Nukern - Montreal, Quebec | September 2015 - October 2016

Development and maintenance of a SaaS-based billing system aimed at web hosting companies as well as freelancers.

- Front-end development initially in KnockoutJS and rewrite in AngularJS
- Creation of API endpoints using Laravel (PHP) and deployment of multi tenant architecture using Docker

Co-Founder and Chief Technology Officer

Asimov - Montreal, Quebec | July 2014 - September 2015

Project which has sprung from a Startup Weekend event. Using peer-to-peer validation and video clips, the platform aimed to help companies better assess potential candidates technical skills.

- Project management
- Full stack development of the platform using MeteorJS and WebRTC for video recording.
